Summer Programmes

Coronavirus (COVID-19) catch-up premium

Programmes to support, engage and motivate learners

Learn by Design bring education to life through the delivery of cross-curricular and extracurricular activities. We work hand in hand with schools to ensure the activities we provide create the impact that your learners need with the key drive being to inspire, prepare and motivate participants to learn effectively.

We are a dynamic and committed team working to the highest educational standards. We deliver national, regional and individual programmes on behalf of schools, corporate and public sector clients including the delivery of multiple DfE funded programmes. Learn by Design provide quality, value for money, educational products and services to inspire future generations.

What can we offer?

A range of options to meet your needs

We can provide a 4 week, 4 hours a day programme of activities developed with you to meet the needs of your learners. The 4 week programmes will build resilience in learners as well as supporting with elements of catch-up.

Week 1	Strong Start
Week 2	Building Up
Week 3	Knowledge is Creativity
Week 4	Celebration

We can also provide shorter programmes of 1, 2 or 3 weeks to compliment in house provision you may be planning or individual activity sessions that can be offered as part of your own provision.

One of our specialisms is providing transition focused programmes for the following age groups:

Year 2 transitioning to key stage 2	Moving on
Year 6 transitioning to key stage 3	Moving up
Year 9 transitioning to key stage 4	Moving forward

What will the structure of the programme look like?

Activities will draw on our curriculum enrichment specialisms of **STEM, creative arts, performing arts, enterprise, employability, career related learning, health & well-being** and **resilience building**.

For key stage 1 and 2 our programmes will focus on motivational play based activities that blend literacy, numeracy, science, art and SMSC (spiritual, moral, social and cultural development) alongside health, well-being and nutrition activities.

For key stage 3 and 4 our programmes will focus on motivational and engaging cross-curricular activities that blend health and well-being with teamwork projects and action learning.

How will the programmes engage learners?

To engage, excite and motivate learners we assign a theme to each week of activity. There are 10 themes to choose for this topic-based learning approach. One theme can be used across the 4 weeks or they can be integrated on a 'mix and match' basis according to needs and preferences.

SUMMER PROGRAMME

THEMES

Planet Earth and Climate Change theme will use nature and physical geography as its focus. It will look at the wonders of the natural environment as well as exploring sustainability and the impacts of climate change.

Space theme will explore all things space related from technology and the history of space travel to astronaut fitness and nutrition.

Olympics theme will use planning and taking part in an athletic competition as its focus to explore leadership, staying positive, teamwork, problem solving and aiming high.

Around the World theme will focus on the exploration of different cultures from around the world as its focus.

Fairy Tales and Magic theme will use storytelling and creative worlds as its focus.

Romans (or another period in history) theme will explore living life in the way that these people did and making comparisons to today's world.

Water and Oceans theme will explore the critical need for water in our everyday lives as well as exploring our oceans.

Lights, Camera, Action theme explores the world of TV, Film, Radio and Theatre.

How do I become...? theme explores the world of work to excite learners around future careers, raising aspirations, challenging career stereotypes and increasing understanding of the link between what they learn at school and their future.

Energy and Power theme explores energy using a series of creative thinking and problem-solving challenges to find solutions to problems using new technologies.

What other experience do we have?

Learn by Design has been providing summer holiday transition camps for over 20 years in a variety of locations across England. We are also one of the largest National Citizen Service providers in the country providing summer camp experiences for over 10,000 young people each year.

Feedback:

“ The Summer Transition programme is a fantastic idea for young people to transition from primary to secondary school and should definitely continue in the future. Its a scary time for some children and us adults, but this has certainly helped to ease the anxiety felt by many of us. A lot of my friends have said what a good idea the programme is and that they wished it was provided in all schools. ”

Park View School Parent from 2016

“ Well, everyday when my daughter came home from the Summer Programme, I would ask about her day and she would tell me all the things she had done from **sport, music, singing, dancing, learning** etc. All the things she likes doing and most off all, **she had made new friends** which was the most important thing for her. She has come home smiling everyday. **She has enjoyed every bit of the two weeks and can now relax and enjoy the rest of her holiday without fretting about going to a new school in September and feeling alone. She is definitely more happy about it and more confident.** ”

Park View School Parent from 2016

“ The Learn by Design Education Communicator team did an excellent job today with our students. The sessions were interactive, educational and inspiring. Linc Higher who observed the sessions were really impressed and have given the go ahead to book the team back in for future sessions. ”

Jacqui Gilman - Careers Adviser and Work Experience Coordinator, University Academy Long Sutton
